

**Statistics show REAL results!**

In our first two years, REAL volunteers were paired with

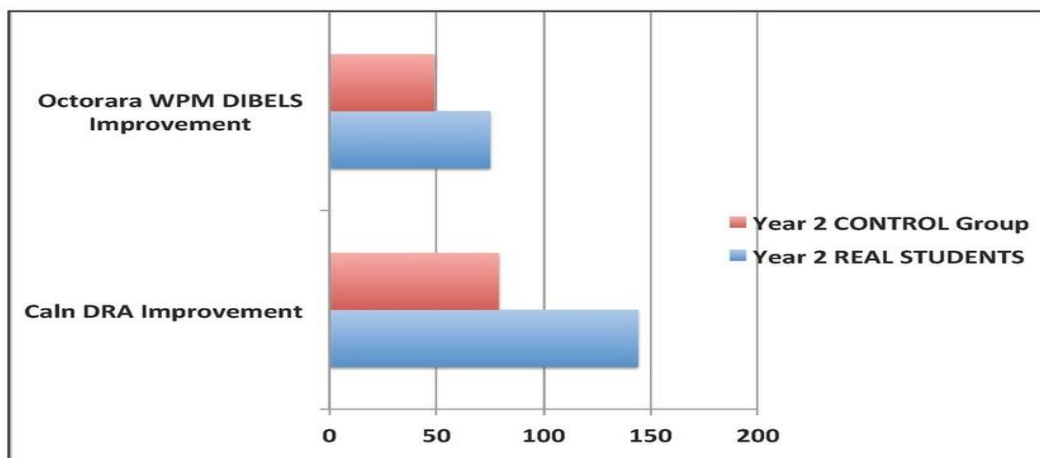

2nd grade students at Caln Elementary, Thorndale and Octorara Primary Learning Center, Atglen.

Our first year was a big success! Between September, 2014 and January, 2015, 60 volunteers were trained and began one-on-one tutoring to 44 second grade students.

To see the impact one-on-one tutoring has on our 2014-15 second grade students, we compared the increase in oral fluency WPM for REAL students to a control group (who had no intervention or tutoring) of second grade students at each school. (See the chart to the left)

**ALL of the REAL students showed improvement in their oral fluency words per minute, or WPM.**

As you can read from our chart below, our second year brought similar results, as REAL students measured a dramatic growth percentage over a control group.

\*In the 2015-2016 school year, students at Octorara continued to be measured using WPM (words per minute) while Caln Elementary students were measured using a standard Developmental Reading Assessment (DRA).
